My kids and my wife died in a car crash and I didnt even bother to go to their funeral cuz I had to play this game. So blessed having discovered this game it changed my life (+gave me terminal brain cancer). Jesus himself must have created this masterpiece, cant wait for NeoBalls2 being released.. Extremely awkward gameplay and controls. This thing is simply unplayable, for me at least.. I'd argue this game is a complete and total scam. In a previous review i called Sit on bottle the worst game in my steam library. I forgot that game actually works. This game is total and complete luck, and (god forbid if) you get lucky, you to do it 20 times over with seemingly no solution and not all the achievements are functional. The dev refuses to fix his achievement software (u2665u2665u2665u2665 you, this does not earn the title of "game") under the guise of "development

has stopped." This leaves literally *zero* reason to play the game since it only exists to boost people's numbers and its way of doing that is undeniably flawed and it can't even give you all it has. Avoid this software developer's whole catalog. You don't need the achievements, as tempting as NeoSticks is. There's like 700k+ you can get if you exclude these neo games. It's just a tiny blip in the numbers.. Any non-deterministic physics game is immediately unsalvageable, and the awful controls don't do anything to help.. Ok you use the lasers to make a barrier where the ball goes and the mines launch the ball. It will take time to beat a level. Watch the trailer to get a sense of what to do. Not my kind of game though, give it a try if it's on sale.. I was unable to move the sphere. The controls seem to be completely broken.

New Neo Game! :. So Good : We fixed everything All achievements are ready Thank you. NeoBalls2 was released :. Aquarium in real time :. NeoBalls coming soon : New Neo style game. NeoSticks Released 5000achievements :. Trading cards coming soon! : We know you all want cards and soon they will be!. We apologize : We have some problems with the server.
